Managing Rain Water --- Make Sri Lanka Prosperous

Due to heavy rainfall received in the upper catchment areas of the Mahaweli River over the past few hours, there is a risk of **minor flooding** in the low-lying areas surrounding the Mahaweli River within the Divisional Secretariat Divisions of Ganga **Ihala Korale, Udapalatha, Doluwa, Udunuwara, Yatinuwara, Gangawata Korale, Harispattuwa, and Pathadumbara**. Residents living in the above-mentioned areas and motorists using roads passing through these areas are urged to exercise extreme caution and remain highly vigilant regarding the prevailing situation. Furthermore, residents living in close proximity to the Mahaweli River in these areas are advised to remain highly alert to the situation and take all necessary precautions to protect themselves from any potential flooding. The relevant disaster management authorities are requested to take all necessary measures in response to this situation.
